

PHOENIX RECOGNIZED FOR OUTSTANDING BUSINESS ACHIEVEMENTS

For Immediate Release – March 18, 2009

Washington, DC -- Phoenix International Holdings, Inc., (Phoenix) was recognized by Microsoft® with a 2009 Microsoft Dynamics Customer Excellence Award, and was honored by Microsoft executives at an awards luncheon held March 10 at Convergence 2009 New Orleans, the premier Microsoft Dynamics user conference.

The 2009 Customer Excellence Awards recognize and celebrate Microsoft Dynamics' customers that have achieved notable accomplishments using Microsoft Dynamics, a line of financial, customer relationship, and supply chain management solutions that help businesses work more effectively.

Phoenix, working with Microsoft Dynamics certified partner SSI Consulting of Baltimore, MD, was recognized for its successful implementation of Microsoft business intelligence and financial products, its strong commitment to Microsoft technology and services, service as a valued source of continual feedback to Microsoft, and its willingness to share its knowledge with other business entities.

Established in 1997, the Customer Excellence Awards are awarded each year at the Convergence user conferences in the US and Europe. Microsoft Dynamics customers, partners, and team members submit nominations. Judging teams rated nominees on creativity, vision, and business benefits. Proposed winners for each category were then presented and reviewed by a panel of Microsoft executive judges for final approval.

Phoenix provides manned and unmanned underwater operations, design engineering, and project management services to clients in the defense, offshore oil & gas and other ocean-interest industries worldwide. Expertise is available from six regional offices in the areas of wet and dry hyperbaric welding, conventional and atmospheric diving, robotic systems, tooling, and engineering. Services include Underwater Ship Inspection & Repair, US Navy & ABS Certified Underwater Welding, ROV Operations, Deep Ocean Search & Recovery, Subsea Construction Support, Submarine Rescue, and Underwater Equipment Design. Phoenix resources include divers and diving systems, one-Atmosphere Diving Systems (ADS), Remotely Operated Vehicles, associated tooling systems, and vessels.
